Seeking '27 Summer internships in software and ML engineering (backend, data, and ML systems)

Active U.S. Department of Defense Secret Security Clearance

EDUCATION

ROCHESTER INSTITUTE OF TECHNOLOGY (RIT)

Rochester, NY

BS in Artificial Intelligence, expected to be the first graduate of RIT's AI program.

Anticipated May 2028

Minors in Software Engineering, Applied Stats, and Math, Immersion in American Sign Language

Relevant Coursework: Natural Language Processing, Enterprise Software, ML, Stock Algo Trading, Linear Algebra

RIT Presidential Scholar, Dean's List

SKILLS

Programming: Python, Java, C/C++, JavaScript, SQL, Rust, Go, CSS, Bash, C#, SQL, MongoDB

Frameworks & Libraries: React, Angular, Node.js, Express, PyTorch, Scikit-learn, Pandas, TensorFlow

Data & Cloud Tools: Redis, Grafana, Tableau, Jira, Docker, Squadcast, Confluence, MS Foundry, OpenAI API,

EXPERIENCE

LOCKHEED MARTIN — Software Engineer Intern, Fort Worth, TX

May 2026 - Jul 2026

- Worked with the F-16 IFG team in an ACA bay, with a DoD security clearance
- Set up a Jira site and used Python scripts to migrate all of the tickets on MS Planner over with no data loss, then ran demos, received feedback/suggestions, and iterated on the project continually
- Worked on creating AI agents/scripts to convert F-16 TOs from SGML to XML with a target of 80% accuracy

REDIS — Cloud Service Ops R&D Intern, Remote

Jun 2025 - Aug 2025

- Built Python-based automation pipelines integrated with REST APIs (Glean, Jira, Squadcast) to process 4,000+ tickets, cutting manual categorization time by 95% and improving ticket labeling accuracy +70% vs. manual baseline (300-ticket spot-check)
- Unified pipelines from four external systems (Jira, Grafana, Zendesk, Squadcast) plus CSV, Google Sheets, and Tableau exports; achieved 99.6% job success over 7 runs
- Automated RCA rollups + exec slides (Python to Tableau), reducing prep from 4h to 3m and standardizing leadership reporting (weekly)

PROJECTS

Orbit (xAI Grok Competition Winner) — Autonomous Multi-Agent Operating System

- An autonomous multi-agent operating system for college students; won the xAI Grok competition by unifying academic, calendar, health, finance, career, travel, and campus-life workflows in a single conversational interface
- Designed Orbit Core, a Grok Bot-based orchestration layer that routes natural-language requests across 11 specialized domain agents
- Built agent workflows that ingest Google Drive lecture materials to generate flashcards, summaries, and quizzes; schedule study blocks on live calendars; and support personalized budgeting, fitness, internship, résumé, and travel planning

ASL Study Tool — Full-Stack Web Application: <https://asl-study-tool-kqbn-one.vercel.app/>

- Engineered an interactive American Sign Language education web app featuring 9 core decks, 140+ animated flashcards with 3D CSS perspective flips, and video streaming.
- Implemented client-side computer vision utilizing Google MediaPipe Tasks Vision to evaluate real-time webcam sign landmark geometry across 6 movement dimensions with custom scoring heuristics.
- Built a timed quiz mode with fuzzy slash-variant answer validation, synthesized Web Audio feedback, and automated reinforcement for missed signs.
- Tech Stack: React 19, TypeScript, Node.js, Express, PostgreSQL / Supabase, MediaPipe, Vercel, Render

Kalshi Quant — Prediction Market Trading System

- Built a point-in-time-correct research and execution engine for binary prediction-market contracts on Kalshi, targeting inefficient corners (weather, niche political) with a polyglot Python + Rust architecture
- Implemented a Bayesian Gaussian pricer with bias-corrected ensemble forecasts, fractional-Kelly sizing with fee-adjusted edge gates
- Tech Stack: Python, Rust, Polars, PyArrow, Postgres/TimescaleDB, PyO3, Docker, pytest, Hypothesis

EXTRACURRICULARS

Volleyball: Captain of Men's Club Volleyball, grew Instagram reach 42%, designed 12 assets, organized 7 events. Also was an ECVA All-Star

Membership: Society of Software Engineers, Society of Asian Scientists and Engineers, Computing Organization for Multicultural Students, RIT AI Club
